

## Electrochemistry 2017

**“Unleashing various aspects and recent advancements in Electrochemistry”**

**July 10-11, 2017, Berlin, Germany**

Conference Series LLC welcomes chemical professionals, professors, researchers, research scholars, scientific communities, delegates, students, business professionals and executives from all over the world to attend the **“International Conference on Electrochemistry”** which is going to be held during July 10-11, 2017 at Berlin, Germany which includes prompt Keynote presentations, Oral talks, Poster presentations, symposiums, workshops and Exhibitions.

[Electrochemistry 2017](#) targets the recent accomplishments related to electrochemical field to enhance the awareness of students and researchers from all over the world with the help of esteemed researchers and inspiring speakers. The conference will see some of the glorious works relevant to electrochemical and electrical field thus accelerating analytical scientific works. Electrochemistry 2017 also gratifies the exhibition of products and services from various commercial and non-commercial organizations thus interlinking academia and business.

### Conference Highlights

- **Advances in Electrochemistry**
- **Theoretical and Computational Electrochemistry**
- **Electroanalytical Chemistry**
- **Electrochemical Energy Conversion and Storage**
- **Bioelectrochemistry**
- **Electrochemical surface science**
- **Batteries and energy sources**
- **Organic and Organometallic Electrochemistry**
- **Corrosion Science and Technology**
- **Physical and Analytical Electrochemistry**
- **Applications of Electrochemistry**
- **Electroplating & Coatings**
- **Organic and Bioelectrochemistry**
- **Electrochemical Engineering**
- **Carbon Nanostructures and Devices**
- **Potentiostat Electrochemistry**
- **Electrochemical Methods of Analysis**

Register before the early bird dates at

<http://electrochemistry.conferenceseries.com/registration.php>

**Organizing Committee for Electrochemistry 2017:**

Evgeny Katz, Clarkson University, USA

Ruiyong Chen, Joint Electrochemistry Lab, KIST, Germany

Rolando Guidelli, Florence University, Italy

Grzegorz Milczarek, Poznan University, Poland

Ingo Krossing, Albert-Ludwigs-University, Germany
